- 1) The meeting was opened with a discussion on the current Case 11-30 Section 702 on Base Materials. Several Agencies have expressed a concern over the proposed change to reduce the current 50% fractured face value to 30% to match the current ADOT requirements. The Group decided to leave the 30% requirement in the proposed revision and would present this to the Standards Committee at the next meeting. We also discussed the possible inclusion of recycled materials being added to 702 and other Sections. The Group agreed it would be best to let the current hold-over Case 11-30 be approved to go into the Standards as soon as possible to complete the work started last year. We will bring a new Case to the Standards Committee regarding recycled materials.
