Summary of Questions/Comments

- The design of Loop 202 through Laveen and Ahwatukee and west Phoenix needs to be changed.
- One of the big things we need is more money in work force development.
- Using arterial money to fund 80 percent of light rail creates a lot more congestion and pollution.
- We need to take freight and people and bring them into Hance Park or Downtown Depot and have it elevated and have it fast.
- The road between Phoenix and Tucson needs to be a hallmark project. There are too many terrible accidents and that can be fixed if we work on it.
- We need to look at our high concentration around the Broadway curve and use Grand Avenue better. Using and getting better transportation from the west side and Grand Avenue would help that.
- More funding for Trip Reduction and Telework programs is good.
- The more that we can do to find people that love to go by alternative means helps out with air The Dial-A-Ride and bus and light rail are really voluntary forms of transportation for people without disabilities. For people with disabilities, it's vital for them to get around.
- It would be very nice in Scottsdale, to be able to go straight down on Hayden, 64th Street, one of those streets, and have a Park and Ride that you could get onto the light rail with, so that you could go downtown.
