MAG Asphalt/Materials/Concrete Working Group

Meeting Notes

Thursday, August 18, 2022 - 1:00 pm – Virtual Meeting - GoToMeeting Platform

Discussion:

1) Call to attention the Antitrust Statement.

2) Case 22-15 - Section 718 on Preservative Seal for Asphalt Concrete – Ryan Stevens, City of Phoenix
   It was discussed and agreed to change the name of the title of subsection 718.3 and proposed material addition from “Cool Pavement Coatings” to “Solar Reflective Pavement Coatings” - to avoid potential infringements upon product trademarks or patents that utilize that name. We also discussed ASTM E1980 on Solar Reflectance Index (SRI) testing that is referenced in the proposed language addition. It was verified that there were no proprietary products or processes referenced. The question was also raised about pay factors and City of Phoenix staff confirmed it was paid by the gallon based on the application rate of gallons per square yard. It was determined that reference to this new product and Section in 718 should also be added to Section 334 as an additional Type in the list of products and some reference to the pay factor. City of Phoenix staff will make those proposed revisions and provide them to Gordon for inclusion int the Case documents for review and potential discussion at the next Standard Specifications Committee meeting on September 7th.

3) New/Old Business – no New/Old business as brought up.

4) Meeting was adjourned.

Date for Next Meeting:
There are currently no other meetings scheduled.
