

Enhancing the Transit Experience

Transit service in the MAG region has grown significantly over the past two decades. MOMENTUM makes wide-ranging investments to help operate and further grow the region's bus transit system, improve and expand high-capacity transit, and continues to support ADA service and operations.

Our Plan:

- Expands the light rail system through federal and local revenues, improving access to western portions of the Valley and providing new opportunities for economic growth.
- Funds critical state of good repair and capital replacements to ensure the rail system is safe and reliable for future generations.
- Introduces bus rapid transit (BRT), a brand new, cost-effective mode of high-capacity transit, to the region.
- Expands access to high quality, reliable transit to improve quality of life, particularly for those with limited transportation options.

Rail Repair

Bus Rapid Transit

Greater Accessibility

Our Plan:

- Continues our commitment to regional bus transit, nearly doubling the region's existing funding for bus operations, and partnering with local jurisdictions to provide service that is more frequent, reliable and matches the schedules and needs of riders.
- Improves and expands existing commuter bus service to better meet demand and reach new employment centers.
- Ensures the bus fleet and supporting infrastructure is in a state of good repair, providing safe and reliable service.
- Continues funding to support ADA service for people who are particularly dependent on transit.
