Additional information about service date	
Number of miles (including deadhead miles) on the sweeper that is being replaced	26,910
Additional information about service miles	
Percent of time older sweeper was out of service	100%
Additional information about out of service percentage	We will be replacing a Schwarze M6 Avalanche rear broom sweeper. This unit has had multiple hydraulic leaks, and the pump is not functioning properly. The hydraulic system was repaired 2-1/2 years ago but had to be modified due to obsolete parts. The system has never worked properly since. We have had concerns with the water system and pump. There are multiple switches that are broken on the sweeper control unit in the cab. Rear broom and both gutter brooms are worn out. At 10 years old this unit has typical wear and tear of suspension, engine and transmission. Some paint fading, internal hopper wear, and conveyor wear. The HVAC control head is missing out of this unit as well. Tires are in fair condition, it has been sitting unused about 2 years, the unit will jump start and run.
